TELLER AND SILVER.

Senator Teller is still the "grand old man" among Republicans who republicans who republicans who republicans the flat of the sake of policy or is a bubbet. Omniscience fixed couldn't fathous such a waster as the administration's policy or iack of policy. But waiving that, how can manged by the money kings and industrial trusts.

The senator says of the coming presidential campaign: "The Democrais will make silver the leading issue. They will probably have a strong declaration on the subject of trusts, but the anti-trust question will not in any way overshadow, the silver question. The Chicago platform will be adopted, with some additions. The silver cause has not lost an inch of ground, but, on the contrary, progress has been gaining strength since the hast election. For the present the war question overshadows all others, but that is only a temporary matter."

These who have given up the silver fight in order to identify themselves with the defense of trusts, believing that will be the predominant issue, will find little consolation in the expressions of Henry M. Toller. And all whochilm that the silver made is dead, or that 'ill is useless to make another.

VI. MOLIERE.
(Concluded.)

The work that Moliere did in creating the French comic drama should first be noticed. Up to his time, as has been pointed out in the sketch of his life, the drama in France had hardly emerged from the temporary booth. Companies of actors invented their dialogues as they went along and sought to amuse by farcical plets and ludicrous scenes. Just as his contemporary, Pierre Corneille, rescued tragedy from its degradation and replaced the rhodomontaics of mouthing actors by the lofty verse which founded the classical French tragedy, so Mollere on his side escaped from pure farce and as the century itself. Rom at the limit and the more delicate comedy.

Three distinct phases can be noted in

The first the control of the control

pend his strength upon the analysis of emotion and the creation of character.

To push this comparison too far would be unfair to Mollere, for Shakespeare is the master mind of all literature. He scared to heights and he explored depths, and he had a range to which Mollere could not pretend. His is the spirit of soul-searching tragsdy; of romantic comedy, of dramatic history; and in no one of these is Mollere his rival. But in the comedy of real life he is not Mollere's rival. In every variety of the comic drama Mollere is unequaled—in farce, in the comedy of situation, in the comedy of character and in the comedy which is almost stiffened into drama, yet without ceasing to be comedy. Shakespears is the greatest of dramafists, no doubt, but Mollere is indubitably the greatest of comic dramafists, no doubt, but Mollere is indubitably the greatest of comic dramafists, in sheer comic force the Frenchman is stronger than the Englishman, or at least more abundant, and also in the conneiling power of humor. The influence of Shakespeare upon the comedy of the influence of humor. The influence of Shakespeare of humor. The influence of Shakespeare of humor. The influence of Shakespeare upon the comedy of the influence of Mollere upon the comedy of the influence of Mollere upon the comedy of the mineteenth century is overwhelming, and the author of the "Demi-Monde," the authors of the "Gendre da M.
